

TC Handling Systems

Low Weight Slab Bar Tong

Datasheet

003-2010

Technical Data:

Range: 250–760 mm

Width: 600–3000 mm

Capacity: 10–45 tons

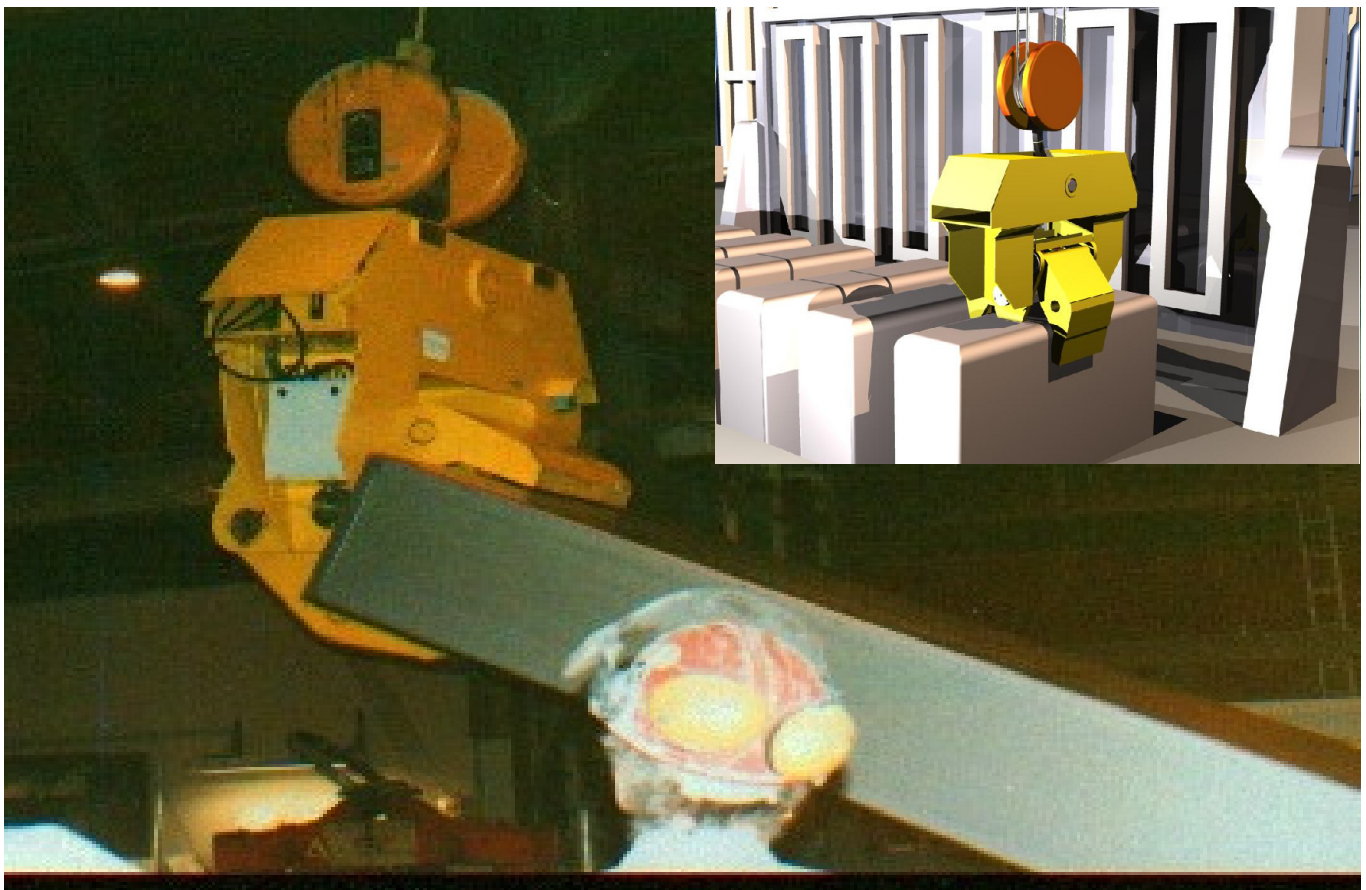

Weight: 1500–3500 kg

The TC low weight Slab Bar Tong has a very compact and low weight design. The tong can only be used during stripping operation—no horizontal handling. This unit grabs the slab at the long side, but handling marks are very limited.

The rotating clamping arm system gives a very soft handling with reduced stress to the crane system during lay down operation.

Advantages:

- Huge range
- Low weight
- Extra mechanical safety system available
- Reliable in operation - low maintenance.
- Service and maintenance system available
- Compact and easy to handle
